Why are we humans exist, what direction are we going?
Being mysterious is the whole thing of being human !

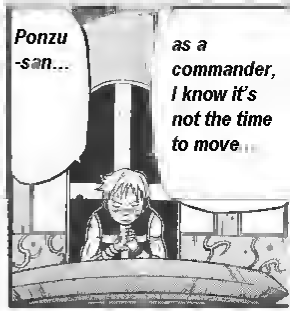
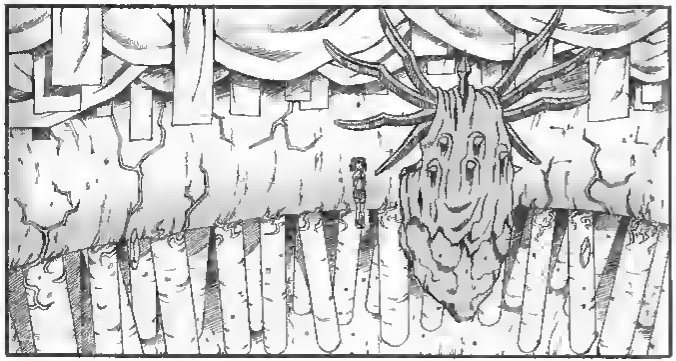
Please don't turn the commander room into a bathroom
What?

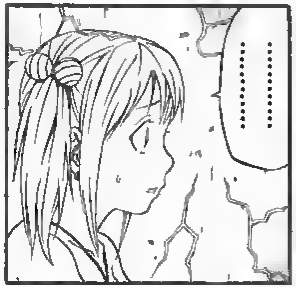


Ponzu -san...
as a commander, I know it's not the time to move...

Then, when everything is in hands... anyways, living things are evolving towards that direction.
Living things are organisms that are programmed to obtain DNA progress of superior resources

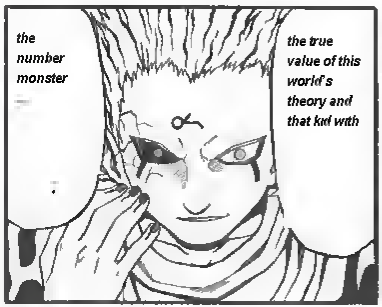
Cross-san, are you washing your rings many times a day?
would die if I don't bathe twice a day.





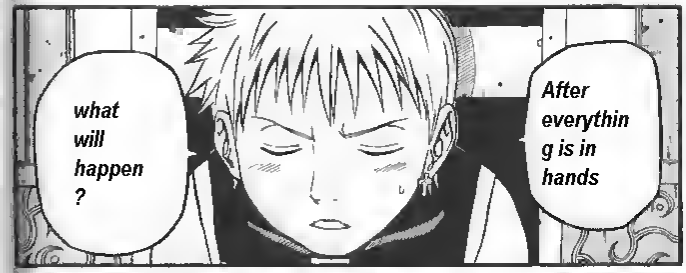
.....

She might be a key item of somethin g...
It is such a waste if this girl is for one-time usage I should make her mine...

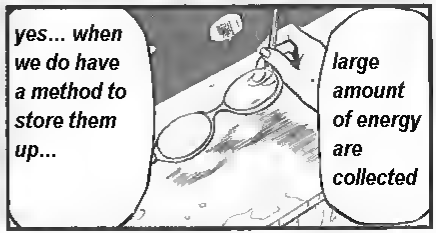


the number monster
the true value of this world's theory and that kid with

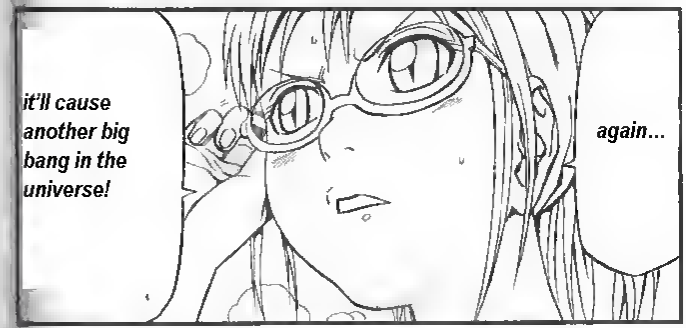
let me tell you...



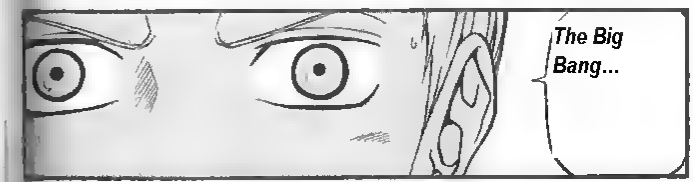
what will happen ?
After everythin g is in hands



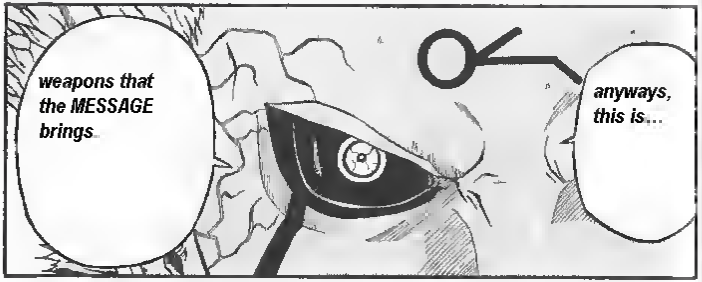
yes... when we do have a method to store them up...
large amount of energy are collected

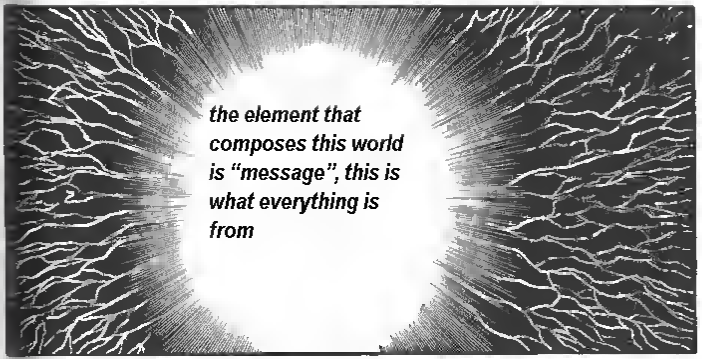


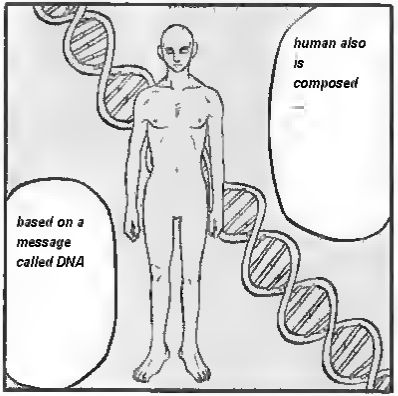
it'll cause another big bang in the universe!
again...



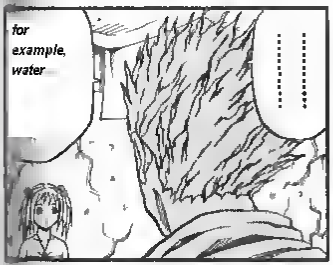
The Big Bang...

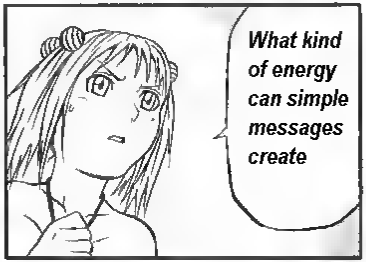




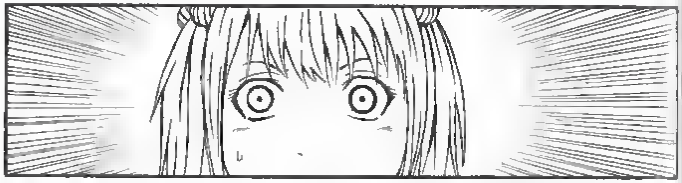


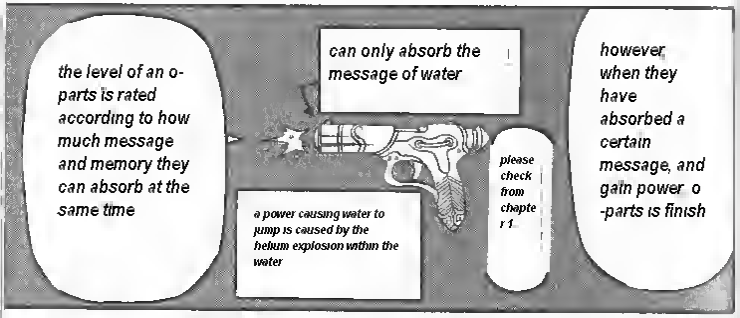
The knowledge of the modern civilization about MESSAGE is equal to ignorant
There are still many unknown elements and composers in the universe



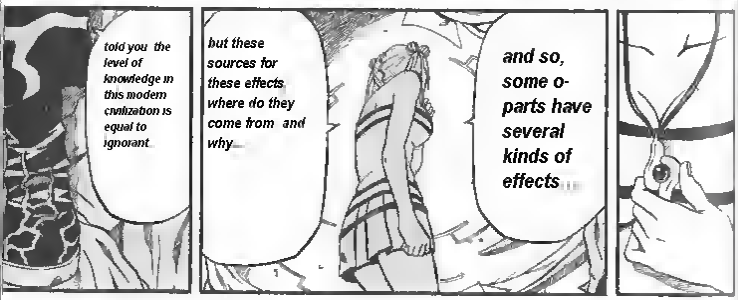


water is composed of H and O



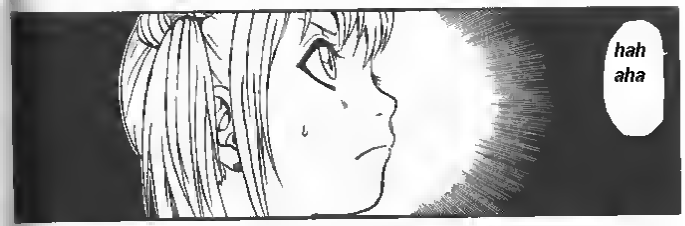


the level of an o-parts is rated according to how much message and memory they can absorb at the same time
can only absorb the message of water
a power causing water to jump is caused by the helium explosion within the water
please check from chapter 1
however, when they have absorbed a certain message, and gain power o-parts is finish

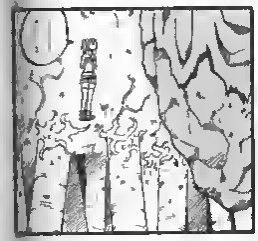


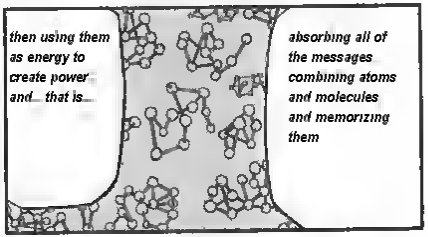
told you the level of knowledge in this modern civilization is equal to ignorant
but these sources for these effects where do they come from and why...
and so, some o-parts have several kinds of effects...

from god
or from devil...
that is a gift from some where.



hah aha

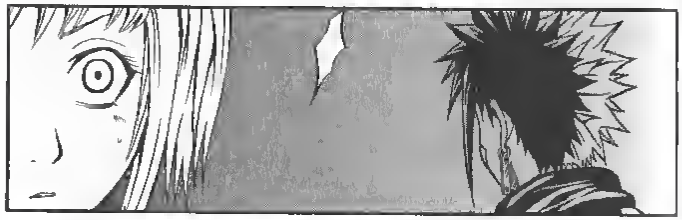




then using them as energy to create power and... that is...
absorbing all of the messages combining atoms and molecules and memorizing them

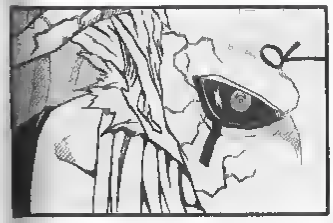
O—PARTS!!

the form, and appearance
They only need an organism of that modern civilization



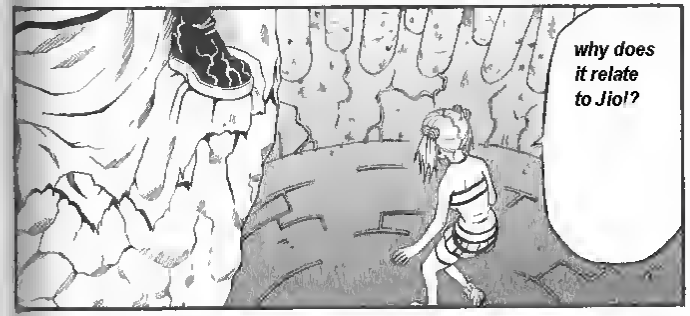
the super ancient ultimate weapon,
that is....

在重覆毀滅、誕生的文明中，它們吸收、分解信息，並不斷地成長。
In the civilization that had gone through devastation and reborn repeatedly, they absorbed and dissolved messages, and grow endlessly

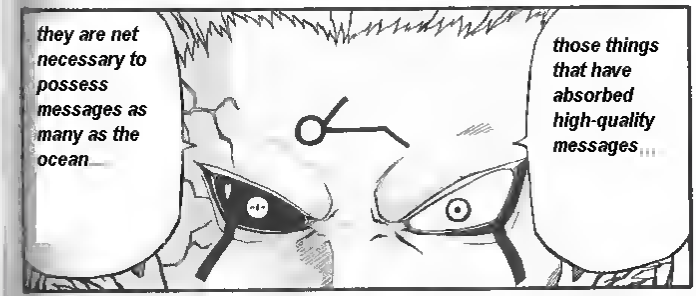


But...

The ruin of Dust Storm
we came from the blue



why does it relate to Jio!?

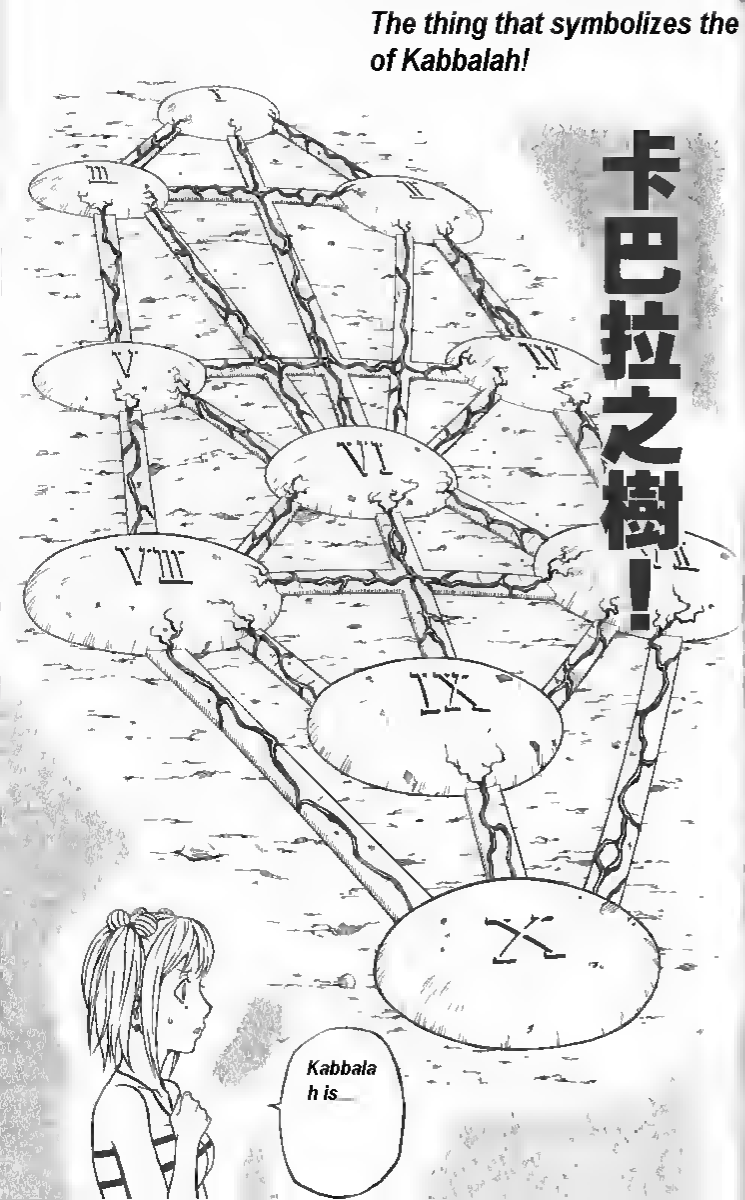


they are net necessary to possess messages as many as the ocean...
those things that have absorbed high-quality messages...

The thing that symbolizes the beginning of everything… the tree of Kabbalah!

卡巴拉之樹！

一切起源的象徵……



weapon ?
Kabbalah is.....
